OnPlan Testing

OnPlan Execution

OnPlan

As a line of defense in your backup and recovery strategy, OnPlan further empowers your disaster recovery and business continuity plan. With OnPlan, Recall provides a turnkey solution customized to protect your business from devastating losses. This includes enforcing rotation policies to make sure necessary media and documentation are accurately identified and protected at all times. In addition, through regular contact with disaster coordinators at your company, we can rapidly expedite the movement of vital information to hot site locations so your operations run with little to no interruption.

Procedures and expertise to help you avert catastrophe

Recall's OnPlan service makes sure you're covered. As the first line of defense in the backup and recovery strategy, OnPlan empowers your contingency plan. Through this service, Recall takes full responsibility for a turnkey solution customized to protect your business from devastating losses. OnPlan enforces your rotation policies, making sure that necessary media and plan documentation are under Recall's protection at any point in time, and that all items are accurately identified. Maintaining contact with the proper disaster coordinators at your company, OnPlan speeds the movement of vital media to hot site locations.

Highly responsive and reliable

As specialists, we know what's required to ensure uninterrupted operation. We have a thorough grasp of contingency planning and can help you design the logistics that are central to a proper recovery program.

Highly responsive and reliable

As your partner that transitions your company from data loss to data recovery, Recall melds the needs and objectives of your data processing organization with those of your hot site providers. Recall maintains close working relationships with some of the most respected names in the business. In turn, clients and hot site providers alike measure Recall's performance on a 24/7 basis and give us consistently high ratings.
